on your smartphone.

**ZODIAC®
EXCLUSIVE
INNOVATION**

AquaLink TRI®

Without doubt the *simplest*
smart remote control.

AquaLink TRI, the new AUTOMATION

Automation is the remote control of all your pool equipment (filtering, water treatment, heating, lighting, cleaning, water features ...). It is domotics applied to the pool. Its objective is to provide you with comfort, safety and remote communications functions.

- Based on its many years of expertise in automation in the United States, Zodiac® innovates with AquaLink TRI®, the solution making it easy to control the different pool equipment using your Smartphone®, your computer or the Aquapalm remote control.

(*) : Free application available for iPhone® / iPad® (Blackberry® and Android® available during the year)

AUTOMATION

ZODIAC®

a better life

Wat is het?

AquaLink TRI?

Zodiac® innovates with its new smart communications protocol "iAquaLink" which is built into the AquaLink TRI® automation system. This language provides a clear and user friendly interface on the different available control media (Smartphone*, Aquapalm remote control...)

► Thanks to AquaLink TRI® you have the possibility of controlling and programming all your pool functions according to your needs and your habits, for maximum comfort and simplicity.

(*) : Free application available for iPhone® / iPad® (Blackberry® and Android® available during the year)

TIP!

Create a programme that will trigger your heat pump and pool cleaner from your place of work, for example. You can then benefit from a clean pool at the ideal temperature as soon as you get home!

Taakstelling

5 apparaten

AquaLink TRI® lets you control up to 5 devices

	Equipment
Standard control	Filter pump, heating, lighting, water features, pressure cleaner booster pump...
